

MONTHLY PROGRESS REPORT

Name of Listed Issuer: Moonbound Mining Ltd. (the "Issuer").

Trading Symbol: MML

Number of Outstanding Listed Securities: 90,972,571

Date: May 7, 2024 (for the month of April 2024)

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer has entered into a non-binding letter of intent with Continental Lithium Africa Development Corporation ("Continental Lithium"), a private arm's length British Columbia company, dated April 29, 2024, whereby the Issuer agreed to acquire all of the issued and outstanding securities of Continental Lithium from the securityholders of Continental Lithium. (Please refer to the news release dated on April 30, 2024)

The Issuer has closed a third tranche of its previously announced private placement and issued 1,781,334 common shares at a price of \$0.30 per common share for gross proceeds of \$534,400 on April 22, 2024. The Issuer also issued 8,750 share purchase warrants (each, a "Finders' Warrant") and paid a cash finder's fees totalling \$2,625 to certain eligible finders. Each Finders' Warrant entitles the holder thereof to purchase one common share at a price of \$0.30 for a period of two years from the date of closing. (Please refer to the news release dated on April 22, 2024)

The Issuer has filed an independent technical report prepared in accordance with National Instrument 43-101 – Standards of Disclosure of Mineral Projects for the mineral resource estimate on its Norrabees 1 lithium project, located on Mining Permit NC 30/5/1/3/2/10950 MP within the northwestern part of the Northern Cape Province, South Africa. (Please refer to the news release dated on April 15, 2024)

The Issuer has completed the filing of the Company's Form 51-102F4 Business Acquisition Report in connection with its acquisition of 1442160 B.C. Ltd., a private arm's length British Columbia corporation, completed on January 29, 2024. (Please refer to the news release dated on April 15, 2024)

The Issuer is a mineral exploration company which currently has three exploration projects and is seeking to acquire additional mineral exploration properties. The current projects include the Yak Property, located in northwestern British Columbia, Canada, and the Strathmore Property, which includes seven mining claims located in Namibia as well as the Norrabees project in Northern Cape, South Africa.

2. Provide a general overview and discussion of the activities of management.

Management's principal activities consisted of, but were not limited to:

General management and administrative matters. Project planning work and efforts to complete financing for existing projects.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

Following the acquisition of 1442160 BC Ltd, which holds rights to the Norrabees Lithium project located in the Northern Cape, South Africa the Issuer intends to provide both a work and exploration program together with an associated budget that we progress the project through the development phases and expand on the existing resource profile.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

None

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

None

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

None

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

None

8. Describe the acquisition of new customers or loss of customers.

None

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

None

10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

The Issuer has no employees at present but has a team of subcontractors in Canada and South Africa.

11. Report on any labour disputes and resolutions of those disputes if applicable.

None

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

None

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

None

14. Provide details of any securities issued and options or warrants granted.

On April 22nd, 2024 the Issuer closed a private placement offering and issued 1,781,334 common shares at a price of \$0.30 per common and also issued 8,750 share purchase warrants to certain eligible finders share. (Please refer to the news release dated on April 22, 2024)

15. Provide details of any loans to or by Related Persons.

None

16. Provide details of any changes in directors, officers or committee members.

No changes in April 2024.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

See attached Schedule A. The information in Schedule A is a summary only of certain risk factors and is qualified in its entirety by reference to, and should be read in conjunction with detailed information appearing elsewhere. These risks and uncertainties are not the only ones the Issuer is facing. Additional risks and uncertainties not presently known to the Issuer, or that it currently deems immaterial, may also impair its operations. If any such risks actually occur, the business, financial condition, liquidity and results of the Issuer's operations could be materially adversely affected. The risk factors described in Schedule A should be carefully considered by readers, including investors considering a purchase of securities of the Issuer, along with all other information set forth elsewhere. An investment in securities of the Issuer should only be made by persons who can afford a significant or total loss of their investment.

Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Schedule A - Risks Related to Moonbound Mining Ltd. Business

The Company is in the business of exploring and developing mineral properties, which is a highly speculative endeavour and subject to significant risks. Risk factors include, but are not limited to, the following:

Limited Operating History

The Company has no history of earnings. There are no known commercial quantities of mineral reserves on any properties optioned by the Company. There is no guarantee that economic quantities of mineral reserves will be discovered on the Property by the Company in the near future or at all. If the Company does not generate revenue, it may be unable to sustain its operations in which case it may become insolvent and investors may lose their investment.

Uncertain Liquidity and Capital Resources

The Company may need to raise additional capital by way of an offering of equity securities, an offering of debt securities, or by obtaining financing through a bank or other entity. In particular, the Company may not have sufficient funds to complete the recommended exploration program on the Property. The Company has not established a limit as to the amount of debt it may incur nor has it adopted a ratio of its equity to debt allowance. If the Company needs to obtain additional financing, there is no assurance that financing will be available from any source, that it will be available on terms acceptable to the Company, or that any future offering of securities will be successful. If additional funds are raised through the issuance of equity securities, there may be a significant dilution in the value of the Company's common shares. The Company could suffer adverse consequences if it is unable to obtain additional capital which would cast substantial doubt on its ability to continue its operations and growth.

Dilution

Common shares, including rights, warrants, special warrants, subscription receipts and other securities to purchase, or to convert into or to exchange into common shares, may be created, issued, sold and delivered on such terms and conditions and at such times as the Board may determine. In addition, the Company will issue additional common shares from time to time pursuant to the options to purchase common shares issued from time to time by the Board. The issuance of these common shares will result in dilution to holders of common shares.

Speculative Nature of Mineral Exploration

Resource exploration is a speculative business, characterized by several significant risks, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits, but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals acquired or discovered by the Company may be affected by numerous factors that are beyond the control of the Company and that cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, the combination of which factors may result in the Company not receiving an adequate return of investment capital. There is no assurance that the Company's mineral exploration activities will result in any discoveries of commercial bodies of ore. The long-term profitability of the Company's operations will in part be directly related to the costs and success of its exploration programs, which may be affected by several factors. Substantial expenditures are required to establish reserves through drilling and to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis.

Acquisition of Additional Mineral Properties

If the Company abandons the exploration and development of the Property, there is no assurance that it will be able to acquire another mineral property of merit or that such an acquisition would be approved by the securities exchange. There is also no guarantee that the securities exchange will approve the acquisition of any additional properties by the Company, whether by way of option or otherwise, should the Company wish to acquire any additional properties.

Mineral Deposits

The Property is in the exploration stage only and is without known mineral resources or reserves that could constitute deposits. Development of this Property would follow only if favourable exploration results are obtained. The business of exploration for minerals and mining involves a high degree of risk. Few properties that are explored are ultimately developed into producing mines.

Uninsurable Risks

In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions, including rock bursts, cave-ins, fires, flooding and earthquakes, may occur. It is not always possible to fully insure against such risks. The Company may decide not to take out insurance against such risks, as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any future profitability and result in increasing costs and a decline in the value of the securities of the Company.

Environmental and Safety Regulations and Risks

Environmental laws and regulations may affect the operations of the Company. These laws and regulations set various standards regulating certain aspects of health and environmental quality. They provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to rehabilitate current and former facilities and locations where operations are or were conducted. The permission to operate can be withdrawn temporarily where there is evidence of serious breaches of health and safety standards, or even permanently in the case of extreme breaches. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of acquired properties or noncompliance with environmental laws or regulations. In all major developments, the Company generally relies on recognized designers and development contractors from which the Company will, in the first instance, seek indemnities. The Company intends to minimize risks by taking steps to ensure compliance with environmental, health and safety laws and regulations, and operating to applicable environmental standards. There is a risk that environmental laws and regulations may become more onerous, making the Company's operations more expensive.

Key Person Insurance

The Company does not maintain key person insurance on any of its directors or officers, and as result the Company would bear the full loss and expense of hiring and replacing any director or officer in the event the loss of any such persons by their resignation, retirement, incapacity or death, as well as any loss of business opportunity or other costs suffered by the Company from such loss of any director or officer.

Mineral Titles

The Company is satisfied that evidence of title to the Property is adequate and acceptable by prevailing industry standards with respect to the current stage of exploration on the Property. The Company may face challenges to the title of the Property or subsequent properties it may acquire, which may prove to be costly to defend or could impair the advancement of the Company's business plan.

Loss of Interest in Properties

The Company's ability to maintain an interest in the properties owned by the Company will be dependent on its ability to raise additional funds by equity financing. Failure to obtain additional financing may result in the Company being unable to make the periodic payments required to keep the Property in good standing and could result in the delay or postponement of further exploration and/or the partial or total loss of the Company's interest in the properties transferred to or optioned by the Company.

Failure to obtain additional financing may result in the Company being unable to complete the required work required to keep the Property interests in good standing and could result in the delay or postponement of further exploration and/or the partial or total loss of the Company's interest in the Property.

Option Agreement Obligations

The Option Agreement provides that the Company must fulfil certain option obligations over specified time periods in order to earn an interest in the properties that are the subject of the agreement. If the Company fails to fulfil these obligations in a timely fashion, the Company could lose its interest in the Property.

First Nations & Indigenous Title

The Property or other properties owned or optioned by the Company may in the future be the subject of Indigenous People land claims. In Canada, the legal nature of First Nations' land claims is a matter of considerable complexity. The impact of any such claim on the Company's ownership interest in the properties optioned or owned by the Company cannot be predicted with any degree of certainty and no assurance can be given that a broad recognition of First Nations' rights in the area in which the properties optioned or purchased by the Company are located, by way of a negotiated settlement or judicial pronouncement, would not have an adverse effect on the Company's activities. Even in the absence of such recognition, the Company may at some point be required to negotiate with First Nations in order to facilitate exploration and development work on the properties optioned or owned by the Company. The Supreme Court of Canada's 2014 decision in *Tsilhqot'in Nation v British Columbia* marked the first time in Canadian history that a court has declared First Nations' title to lands outside of a reserve. The Company is not aware of any First Nations' land claims having been asserted or any legal actions relating to First Nation issues having been instituted with respect to any of the land that is covered by the Property.

Fluctuating Mineral Prices

The Company's revenues in the future, if any, are expected to be in large part derived from the extraction and sale of minerals, which in turn depend on the results of the Company's exploration on these properties and whether development will be commercially viable or even possible. Factors beyond the control of the Company may affect the marketability of the commodities discovered, if any. Commodity prices have fluctuated widely, particularly in recent years. Consequently, the economic viability of any of the Company's exploration projects cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices.

Competition

The mining industry is intensely competitive in all its phases. The Company competes for the acquisition of mineral properties, claims, leases and other mineral interests, as well as for the recruitment and retention of qualified employees with many companies possessing greater financial resources and technical facilities than the Company. The competition in the mineral exploration and development business could have an adverse effect on the Company's ability to hire or maintain experienced and expert personnel or acquire suitable properties or prospects for mineral exploration in the future.

Management

The success of the Company is currently largely dependent on the performance of its directors and officers. The loss of the services of any of these persons could have a materially adverse effect on the Company's business and prospects. There is no assurance the Company can maintain the services of its directors, officers or other qualified personnel required to operate its business.

Financing Risks

The Company has no history of significant earnings and, due to the nature of its business, there can be no assurance that the Company will be profitable. The Company has paid no dividends on its shares since incorporation and does not anticipate doing so in the foreseeable future. The only present source of funds available to the Company is through the sale of its securities. Even if the results of exploration are encouraging, the Company may not have sufficient funds to conduct further exploration that may be necessary to determine whether a commercially mineable deposit exists on the properties owned by the Company. While the Company may generate additional working capital through further equity offerings or through the sale or possible syndication of the Property, there is no assurance that any such funds will be available. At present, it is impossible to determine what amounts of additional funds, if any, may be required.

Going Concern and Requirement to Generate Cash Flow for Financial Obligations

While the information in this MD&A has been prepared in accordance with IFRS on a going concern basis, which presumes the realization of assets and discharge of liabilities in the normal course of business for the foreseeable future, there are conditions and events that cast significant doubt on the validity of this presumption. The Company's ability to continue as a going concern is dependent upon achieving profitable operations and upon obtaining additional financing. While the Company is making its best efforts in this regard, the outcome of these matters cannot be predicted at this time. The Company's ability to generate sufficient cash flow from operations to make scheduled payments to its contractors, service providers and merchants will depend on future financial performance, which will be affected by a range of economic, competitive, regulatory, legislative and business factors, many of which are outside of its control. If the Company does not generate sufficient cash flow from operations to satisfy its contractual obligations, it may have to undertake alternative financing plans. The Company's inability to generate sufficient cash flow from operations or undertake alternative financing plans would have an adverse effect on its business, financial condition and results or operations, as well as its ability to satisfy its contractual obligations. Any failure to meet its financial obligations could result in termination of key contracts, which could harm the Company's ability to provide its products and services.

Negative Cash Flows from Operations

For the three months ended July 31, 2023, the Company sustained net losses from operations of \$168,855. The Company continues to have negative operating cash flow. It is highly likely the Company may have negative cash flow in any future period, and as a result, the Company will need to use available cash, including proceeds to fund any such negative cash flow.

Resale of Common Shares

The continued operation of the Company will be dependent upon its ability to generate operating revenues and to procure additional financing. There can be no assurance that any such revenues can be generated or that other financing can be obtained. If the Company is unable to generate such revenues or obtain such additional financing, any investment in the Company may be lost. In such event, the probability of resale of the common shares purchased would be diminished.

Price Volatility of Publicly Traded Securities

In recent years, the securities markets in Canada have experienced a high level of price and volume volatility, and the market prices of securities of many companies have experienced wide fluctuations in price that have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. It may be anticipated that any quoted market for the common shares will be subject to market trends generally, notwithstanding any potential success of the Company in creating revenues, cash flows or earnings. If an active public market for the common shares does not develop, the liquidity of a shareholder's investment may be limited and the share price may decline below the initial purchase price.

Conflict in Ukraine

The Company's business financial condition and results of operations may be negatively affected by economic and other consequences from the conflict in Ukraine and the sanctions imposed in response to that action in late February 2022. While the Company expects any direct impacts of the conflict in Ukraine to the business to be limited, the indirect impacts on the economy and on the mining industry and other industries in general could negatively affect the business and may make it more difficult for the Company to raise equity or debt financing. There can be no assurance that the Company will not be impacted by adverse consequences that may be brought about on its business, results of operations, financial position and cash flows in the future.

Government Laws, Regulation & Permitting

Mining and exploration activities of the Company are subject to both domestic and foreign laws and regulations governing prospecting, development, production, taxes, labour standards, occupational health, mine safety, waste disposal, toxic substances, the environment and other matters. Although the Company believes that all exploration activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development.

Amendments to current laws and regulations governing the operations and activities of the Company or more stringent implementation thereof could have a substantial adverse impact on the Company. The operations of the Company will require licenses and permits from various governmental authorities to carry out exploration and development at its projects. There can be no assurance that the Company will be able to obtain the necessary licenses and permits on acceptable terms, in a timely manner or at all. Any failure to comply with permits and applicable laws and regulations, even if inadvertent, could result in the interruption or closure of operations or material fines, penalties or other liabilities.

Risks associated with foreign operations

The Company currently has active projects in Africa. Accordingly, the Company is subject to all of the risks normally associated with the exploration, development and production of mineral properties in these jurisdictions. The Company's operations could be adversely impacted by political instability, foreign policies, differing business environments and changes in government regulations relating to foreign investment, corporate organization and governance, commerce, taxation, trade and the mining industry. The economies in foreign jurisdictions may differ in many respects, including the level of government intervention, level of development, maturity of the legal system and control of foreign exchange. Any changes in foreign regulations or shifts in political conditions are beyond the

Company's control and there is no assurance that current and future mineral operations will not be adversely impacted by foreign political, social or economic changes.

Foreign Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company does not hold financial instruments in a foreign currency at this time but expects to in future.

Other Risks

The level of demand for the Company's exploration is increasingly affected by regional and global demographic and macroeconomic conditions, including population growth rates and changes in standards of living. A significant downturn in global economic growth or recessionary conditions in major geographic regions may lead to reduced demand for commodities, which could adversely affect the Company's business and results of operations.

Additionally, weak global economic conditions and turmoil in global financial markets, including constraints on the availability of credit, have in the past adversely affected, and may in the future continue to adversely affect, the financial condition and creditworthiness of some of the Company's customers, suppliers and other counterparties, which in turn may negatively impact the Company's business. Any deterioration in economic conditions due to the current coronavirus concerns could negatively impact the Company's exploration.
